EXPERIENCE

Junior Software Developer Intern | Smaac Net Solutions

February 2026 - Present

- Migrated legacy **ERP modules** into a web-based platform using **Python, Django, JavaScript**, and **HTML**, developing reusable components, integrating backend APIs, and implementing **role-based workflows** across business modules.
- Designed and managed **automated testing and release validation workflows** that act as **quality gates** before client releases and branch merges, helping prevent **regressions** and ensure **application stability**.
- Managed deployment of **hotfix** and **releases** for critical client issues, validating fixes and coordinating urgent **production updates** to minimize business disruption and maintain **service continuity**.

Software Engineer Trainee | Consort Digital

October 2025 - January 2026

- Developed registration and **CMS modules** using **React.js, Node.js, Express.js**, and **MySQL**, implementing validation workflows, API integrations, and backend **business logic** to improve system reliability.
- Optimized **database queries** and integrated **caching strategies**, reducing API response latency by **35%** and improving application performance under concurrent usage.

Tech Intern | Sunstone

August 2025 - September 2025

- Enhanced **Sunstone LMS** workflows by implementing **OCR-based document processing** and structured content organization for academic operations.
- Developed features for **Sunstone FORMA** and **AI-powered grading systems**, helping automate evaluation workflows and reduce manual assessment efforts.

PROJECTS

Lab360° *Github Link Deployed Link*

September 2025 - December 2025

- Developed a full-stack laboratory management platform using **Next.js, MongoDB**, and **NextAuth.js**, implementing **role-based access control (RBAC)**, QR/Barcode-based asset tracking, issue reporting, and workflow management for **500+ laboratory assets**.
- Designed and developed **REST APIs, authentication and authorization workflows**, and secure dashboards for Admin, Faculty, and Technician operations with centralized inventory management.
- Structured **MongoDB schemas** and optimized database interactions to support scheduling, asset lifecycle management, and technician workflow automation.

Fluentia - Find Your Flow *Github Link Deployed Link*

June 2025 - August 2025

- Built a real-time communication platform using the **MERN stack** and **Stream API**, implementing messaging, video calling, community features, and **JWT-based authentication**.
- Designed backend APIs and **MongoDB data models** for user management, persistent chat history, AI chat features, gamification systems, and real-time session handling.

SKILLS

Languages: Java, Python, JavaScript

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Flask, Django, RESTful APIs

Databases: MySQL, MongoDB

Tools and Platforms: Git, GitLab, Docker, Postman

Core Concepts: Data Structures and Algorithms, OOP, DBMS

EDUCATION

• Bachelor of Technology in Computer Science and Engineering (AI and ML)

August 2022 - June 2026

K.R. Mangalam University, Haryana

CGPA: 8.86

ACHIEVEMENTS AND LEADERSHIP

- **Winner** – Geekathon Hackathon organized by Geekrooms.
- **Finalist** in multiple national hackathons, including Hack5.0 (NIT Hamirpur), Hacknovate 5.0 and HackKRMU.
- **Lead Organizer** for “Virtual Labs” Workshop initiative by the Ministry of Education, Government of India.
- **Event Coordinator** for “AARAMBH” Freshman Orientation Program involving large-scale event operations.
